That American forests abound in plants which possess the most valuable medicinal virtues is abundantly attested by scores of the most eminent medical writers and teachers. Even the untutored Indians had discovered the usefulness of many native plants before the advent of the white race.

Not less marvelous in the unparalleled cures it is constantly making of woman's many peculiar affections, weakness and distressing derangements of the system, Dr. Pierce's Favorite Prescription is as simply attested by thousands of the most reliable testimonials contained in the following pages as by the most scientific and experienced physicians and medical men.

Both the above mentioned medicines are wholly made up from the electric extracts of native medicinal roots. The processes employed in their manufacture were original and the results shown in the cures effected by them are carried on by skilled chemists and pharmacists with the aid of apparatus and appliances especially adapted for this purpose.

NEW YORK DAY BY DAY.

Kissing in Public Not a Crime. Magistrate Whitman was called upon to pass on the question whether kissing in public amounts to disorderly conduct. The Court decided that it didn't if the girl was willing.

When Higgins was arraigned the Court asked: "What did he do?" "He was kissing a girl on the street." "Is that all?" "Yes."

Mispelled Word Costs \$450. On motion of Lawyer Ralph W. Skinner, Vice-Chancellor Stevens, sitting in Chancery Chambers, Newark, dismissed all the proceedings taken in the divorce suit of Mary Falletto vs. Pietro Falletto because a stenographer wrote the word "delusion" instead of "collusion" in an affidavit made by the plaintiff and annexed to her petition.

Perhaps. Little Ethel likes to apply any new phrase she hears, so the other day she turned the latest thoughtfully over in her mind and then added: "Mamma, you know the new little baby in Spain?" "Yes, dearie, what about it?" "When it gets older will they teach it to walk Spanish?" — Baltimore American.

What It Costs.

The Treasury Department has a great system of accounts. It goes into details with an inspiring industry of research resulting in a perfect labyrinth of averages and percentages. The Treasury Department is one huge anti-hill of "figgers," and succeeding generations of burrowing accountants have wrought some wonderful things with the maze of mathematical records.

A Russian Pastime. If the human jaws need some occupation in the intervals of meals and gossip says Health Culture, masticators could learn a lesson from the peasants of Southern Russia, who exercise their teeth on the hard seeds of the Caspian sunflower.

Racked With Pain, Day and Night, For Years. Wm. H. Walter, engineer of Chatsworth, Ill., writes: "Kidney disease was lurking in my system for years. It had torturing pain in the side and back and the urine was dark and full of sediment. I was racked with pain, day and night, could not sleep or eat well, and finally became crippled and bent over with rheumatism.

Doctors Try Another Plan. People who used to suffer torments of thirst in typhoid fever will wish they had postponed the attack until the present day, when such theories of treatment as the following from the Medical Brief prevail: "If I were asked to name the cardinal features in the management of typhoid fever I would say (1) proper feeding, (2) the prevention of excessive waste incident to high temperature, by the use of water externally and internally, (3) elimination, through the skin, kidneys and intestinal tract, by supplying the patient with an abundance of water and keeping the body clean and comfortable."

And It Would Her Bobbin. Tea drinking frequently affects people as badly as coffee. A lady in Salisbury, Md., says that she was compelled to abandon the use of coffee a good many years ago, because it threatened to ruin her health and that she went over to tea drinking, but finally she had dyspepsia so bad that she had lost twenty-five pounds and no food seemed to agree with her.

The Aluminum Boom.

One of the striking results of the great progress of the automobile industry has been the tremendous development of the manufacture of aluminum, of which some idea may be had merely by quoting a few figures. In France no less than 35,000-horsepower are continually employed in the making of aluminum; Germany utilizes some 21,000 for the same purpose, the United States a like amount, and Scotland about 6,000-horsepower. This represents something like \$2,000-horsepower in round numbers—an amount that can easily be doubled in the works now in existence.

Female Professor. Miss Marguerite R. Frink has been appointed to fill a professorship in the Colorado State Agricultural College, while the regular incumbent, Professor Howlett, is in New York City taking courses in Columbia University. Miss Frink has studied the details of dairying and is an expert in cheesemaking. The young members of society hold her in great demand. She is fond of sports and can ride a horse like a cowboy. In Denver University she was the business and social leader of her class, and managed successfully amateur theatricals.

SUFFERED TORTURES. Racked With Pain, Day and Night, For Years. Wm. H. Walter, engineer of Chatsworth, Ill., writes: "Kidney disease was lurking in my system for years. It had torturing pain in the side and back and the urine was dark and full of sediment. I was racked with pain, day and night, could not sleep or eat well, and finally became crippled and bent over with rheumatism. Doan's Kidney Pills brought quick relief, and in time, cured me. Though I lost 40 pounds, I now weigh 200, more than ever before."

Have Found The Laziest Man. Penitentiary officers at Columbus, O., believe they have found the laziest man in the world in Albert Gornes, who is serving five years for burglary. Gornes deliberately clipped off the index finger of his right hand with a pair of shears. This will class him among the "infirm," and will entitle him to a very light job and probably his absolute divorce from labor of any kind. Gornes had tried every other known means to escape work without success.—Philadelphia Ledger.

Where The Boy Started. "Your boy," said the professor, "has a fine head." "He gets that from me," interrupted the old man, "but he got his brains from his mother." "About four years ago I was afflicted with black scurf, which was a few covering my face, which produced a severe itching irritation, and which caused me a great deal of suffering, to such an extent that I was forced to call in two of the leading physicians of— After a thorough examination of the dermal complaint they announced it to be skin eczema in its worst form. Their treatment did me no good. Finally I became despondent and decided to discontinue their services. Then my husband purchased a single set of the Cuticura Remedies, which entirely stopped the breaking out. I continued the use of the Cuticura Remedies for six months, and after that every spot was entirely gone. I have not felt a symptom of the eczema since, which was three years ago. Mrs. Lizzie E. Sledge, 540 Jones Ave., Selma, Ala., Oct. 25, 1905."

WORKING WOMEN, WHAT THEY SHOULD KNOW.

Women for the most part spend their lives at home, and it is these women who are willing and ambitious that their homes shall be kept neat and pretty, their children well dressed and tidy, who do their own cooking, sweeping, dusting and often washing, ironing and sewing for the entire family, who call for sympathy, and truly the work of such a woman is "never done" and is it any wonder that she breaks down at the end of a few years, the back begins to ache, there is a displacement, inflammation or ulceration of the abdominal organs, a female weakness is brought on, and the struggle of that wife and mother to continue her duties is pitiful.
